### NATURAL SUPPORT FOR IMMUNE & GASTROINTESTINAL HEALTH

#### Supplement Facts

Serving Size: 1 Capsule  
Servings Per Container: 120

|  | Amount<br>Per Serving | % Daily<br>Value |
|--|-----------------------|------------------|
| Tegrice <sup>®</sup> Bovine Colostrum<br>(standardized to contain 40% IgG) | 600 mg                | **               |

\*\* Daily Value not established.

**Other ingredients:** Hypromellose (capsule), micro-crystalline cellulose, vegetable stearate, silicon dioxide.  
**Contains milk. Does not contain gluten.**

**SUGGESTED USE:** 1 CAPSULE PER DAY OR AS DIRECTED BY YOUR HEALTHCARE PROFESSIONAL.

**WARNING:** IF TAKING MEDICATION, PREGNANT OR NURSING CONSULT A PHYSICIAN BEFORE USING.

Tegrice<sup>®</sup> is a registered trademark of Sterling Technology, Inc.

- Pure Tegrice<sup>®</sup> high Immunoglobulin G colostrum extract.\*
- Helps protect & maintain a healthy gastrointestinal lining.\*
- Helps promote active & passive immune protection.\*
- Offers support for a healthy gut inflammation response.\*

**Colostrum Select™** is a high potency nutritional supplement providing 600 mg of Tegrice<sup>®</sup> per vegetarian capsule. Tegrice<sup>®</sup> is a patented, immunoglobulin-rich colostrum extract derived from pure bovine whey and gently processed at low temperatures to ensure maximum bioactivity. Nutrient-rich **Colostrum Select™** contains 40% Immunoglobulin G (IgG) along with other compounds researched to help promote healthy gut barrier function and mucosal integrity, help inhibit inflammatory signaling and help support healthy immune system function.

COLOSTRUM is a unique substance found in mammalian breast milk. It is designed by nature to help support and nourish the newborn immune system with a plethora of bioactive compounds including lactoferrin, immunoglobulins, growth factors, sialic acid, glycoproteins, lysozyme, nucleotides and many other proteins and compounds that aid in nutrition and repair. The colostrum whey used in Tegrice<sup>®</sup> contains 70% proteins, is free of fats and casein, and is sourced from USDA Grade A dairy farms where the cattle are fed a superior diet, supplemented with nutrients and raised without the rote use of artificial hormones or antibiotics.

Because the gastrointestinal system serves as our main route of contact with the external environment, approximately 70% of the entire immune system is housed in gut-associated lymphoid tissues (GALT). **Colostrum Select™** helps to support GALT function and general immune health with enriched levels of broad-range specificity immunoglobulins that can bind to bacteria and other antigens before they enter the bloodstream, facilitating their elimination.

In vitro, colostrum has been shown to support the rapid division and replication of intestinal epithelial cells and to promote epithelial cell migration to areas of injury, a key mechanism in helping to maintain healthy gut lining integrity. In animal and human studies, colostrum has been suggested to reduce the incidence of gastric injury and increased intestinal permeability associated with the use of non-steroidal anti-inflammatory drugs, helping to preserve healthy gut barrier function.

Preliminary research in athletes undergoing strenuous or endurance training activities, i.e. ultramarathon runners, suggests that bovine colostrum supplements may promote beneficial effects on immune function, as prolonged heavy exercise is known to temporarily decrease immune resistance and increase gut permeability. In a live animal model of immune-mediated bowel inflammation, administration of IgG-enriched colostrum was found to help increase levels of anti-inflammatory cytokines, promote epithelial regeneration and hasten repair of damage to the intestinal lining.

The IgG-rich Tegrice® in **Colostrum Select™** has been studied for its ability to speed the migration of healthy gut epithelial cells to damaged areas and to support faster recovery in multiple pathways of intestinal repair. Following three months of consumption, additional demonstrated benefits include a statistically significant reduction in macroscopic and microscopic intestinal injury and an improvement in minor health complaints. The unique blend of immunoglobulins, bioactive proteins and growth factors in **Colostrum Select™** make it a superior adjunctive supplement for helping to support intestinal integrity, healthy mucosal immune protection and overall digestive health.

**Colostrum Select™** featuring researched Tegrice® bovine colostrum is rigorously tested both pre and post production for purity and potency, and has been verified free of contaminants, metals and gluten.
