Sold *Exclusively* by Healthcare Practitioners

Our **Moss Nutrition Select** products cannot be found on retail websites or in store-front retail establishments. We strictly enforce this via a simple, yet unique in-house system. We believe that unless practitioners are able to continue providing services to the public, and derive a meaningful income from supplement sales, they will not be able to succeed. Our **True Market Protection** guarantee supports the bottom line so that practitioners can continue serving the community with ongoing patient-centered care.

We Are Here to Help

DR. JEFFREY MOSS, DDS, CNS, DACBN, is a 1974 graduate of the University of Michigan Dental School and employed clinical nutrition in his dental practice in Grand Rapids, Michigan starting in 1979. As his interest in clinical nutrition and nutritional supplements increased, he made a decision to sell his dental practice in 1985 and become a full-time member of the professional supplement industry, starting as a salesperson in the northeast United States for Standard Process Labs. In 1992 Dr. Moss left his employment with Standard Process Labs and founded Moss Nutrition Products, selling to health care professionals for the next several years a variety of products produced by companies devoted to supporting the needs of health care professionals and their patients. However, as Moss Nutrition entered the 21st century, the goals set by everyone at Moss Nutrition concerning both the products being sold and how they were sold were diverging from the companies Moss Nutrition was representing

to such an extent that it became increasingly apparent that the time had come for Moss Nutrition to produce its own product line. Hence, the Moss Nutrition Professional Supplement Line was created in 2009. The rest, as they say, is history.

Of course, with the above being noted, Dr. Moss never lost his interest in working directly with patients. Therefore, after Dr. Moss left his full-time dental practice, he continued patient care in his part-time clinical nutrition practice, which he maintains to this day. Therefore, if you have a difficult patient and would like to take advantage of Dr. Moss's years of experience and expertise in the use of clinical nutrition in the management of patient concerns, please feel free to contact him either at his e-mail address (jeffmoss@mossnutrition.com) or his telephone number (800-851-5444 ext. 508).

Lastly, it should be noted that Dr. Moss very much enjoys wearing a third hat beyond that of a supplement manufacturer and a clinician. That hat is the one worn as an educator. To that end, over the years since 1985 Dr. Moss has been writing newsletters providing review & commentary on controversial and cutting-edge issues facing the practice of nutritional medicine. In addition, he is a regular lecturer with several organizations such as the Florida Chiropractic Physicians Association, National Nutrition Standard (formerly the American Chiropractic Association Council on Nutrition), and the American Chiropractic Association Council on Diagnosis and Internal Disorders. Finally, it should be noted that, for nearly 20 years starting in 2000 Dr. Moss was a faculty member in the University of Bridgeport Master of Science program in Human Nutrition, where he taught classes on clinical assessment and vitamins and minerals.

Diana Allen M.S., C.N.S.
Product Development Manager and Clinical Specialist

Diana Allen, MS, CNS has a Master of Science degree in Human Nutrition from the University of Bridgeport and is certified as a Nutrition Specialist by the American College of Nutrition.

She came to Moss Nutrition in 2011 with more than a decade of experience in the supplements industry, previously having served as chief technical writer and Education Administrator at Pioneer Nutritional Formulas.

As Product Development Manager, Diana is involved in all aspects of new product formulations, research and development.

She has a precise eye for detail and is committed to selecting the purest and most clinically relevant ingredients for our products. Diana creates informative, referenced Technical Sheets for all products and oversees label accuracy. She also contributes copy for marketing and promotional materials.

Outside of Moss Nutrition, Diana maintains a private practice in nutrition therapy. Her specialties include evolution-based natural foods nutrition, recovery from disordered eating and digestive health and wellness.

We Are Here to Help

Joanne Goding
Vice President, CFO and
Co-owner

Joanne's passion for health and health care stems from the influence of her health and nutrition-oriented, artistic, entrepreneurial mother and her exercise and athletics-oriented, selfless and "work is worship" directed father. Joanne is a self-described "Health Seeker". At

a very young age, she realized that taking care of your health is the best way to enjoy a long, active, quality life - and that it costs less, too. She aims to spread this message.

As a gifted artist; prior to marrying Dr. Jeffrey Moss and joining Moss Nutrition, Joanne operated her own business for a decade as an illustrator and graphic artist, specializing in realistic pen & ink home portraits. With her experience as a sole proprietor, combined with past employment working for 2 different husband/wife owned family businesses, she is a self-taught business woman who understands the challenges of operating a small business and working with family.

Joanne loves helping customers, being creative and being part of a team working towards a common goal. She oversees all marketing design: Website, print materials and email campaigns.

Liz Gelotte
Executive Assistant

Liz's interest in health and wellness started with high school athletics and dance, and expanded through her biology studies at UMass Amherst. During college she especially enjoyed her studies of human biology, nutrition, and sports science.

Liz has worked in family medicine and pediatric practices for 10 years prior to joining the Moss Nutrition team. She was introduced to functional medicine in 2015 while working alongside a functional medicine practitioner. She is excited and hopeful about the prospects of root cause medicine and individualized treatments in treating chronic disease.

In 2020 Liz became a National Board Certified Health and Wellness Coach, after completing her studies with the Functional Medicine Coaching Academy. Since then, she has enjoyed working with individuals and groups to support positive lifestyle changes to meet health and wellness goals.

Liz has a passion for snowboarding which takes her to Vermont most weekends in the winter. In the warmer months she enjoys hiking, camping, and generally anything which brings her outdoors.

Katie called to place a re-order for
SarcoSelect®.

Upon being asked
"How is it working?"
she exclaimed:

"Life Changing!"

We asked her to elaborate and realized that Katie had a fascinating story to tell.

To watch Dr. Moss's video and learn how **SarcoSelect®** helped an athlete go to:

mossnutrition.com/sarco-success

SarcoSelect®, our Signature Product, is a research-based functional food specifically designed to optimize muscle mass and function. Read more on pages 33-34.

5-HTP Select®

M086

Neurological/Mood Support

ZincEval Select®

M097

Minerals, Immune Support

Essential mineral (as zinc sulfate monohydrate). Supports a healthy immune system and proper wound healing.* May be used to conduct a zinc taste test. (Liquid)

Bottle Size: 8 fluid ounces (240 ml)-

Supplement Facts

Serving Size: 10 ml (approx. 2 teaspoons)	Amount
Servings per container: 24	per serving

Zinc (as zinc sulfate monohydrate)	8 mg
---	-------------

Other Ingredients: Distilled water.

Suggested Use: As a dietary supplement, take 2 teaspoons per day or as directed by your healthcare professional.

TASTE TEST TO EVALUATE ZINC STATUS

Hold 1 tsp. **ZincEval Select®** in mouth for 10-30 seconds before swallowing, and note flavor that develops on tongue.

Evaluate zinc status as follows:

- **Immediate, very noticeable bitter, unpleasant or metallic taste:** Indicates optimal levels of zinc are present; suggests no need for zinc supplementation.
- **Slight bitter or metallic taste:** Indicates suboptimal zinc levels; suggests need for zinc supplementation.
- **Absence of taste, sweet or "water-like" taste:** Indicates low zinc levels; suggests definite need for zinc supplementation.

Consider use of **Zinc Select®** capsules to avoid increasingly bitter taste experience as zinc status improves.

Perform follow-up taste tests with **ZincEval Select®** after 2 to 4 weeks of zinc supplementation to help re-evaluate zinc status.

Zinc Select®

M031

Minerals, Immune Support

Zinc in two absorbable chelated forms, with copper for mineral balance and added digestive support to help enhance tolerability.*

Bottle Size: 90 Vegetarian capsules
